

ANNUAL MEETING OF MARINE TECHNOLOGY 2018 HELLENIC INSTITUTE OF MARINE TECHNOLOGY  
04-05 DECEMBER 2018 / EVGENIDES FOUNDATION / ATHENS

## Session 10: “Resolve worldwide activities: Salvage and towage, examples of specialized jobs”

by: **Dimos Iliopoulos** – Naval Architect & Marine Engineer  
Resolve Marine Group (RMG) – Representative for Greece, Cyprus, Turkey

# RESOLVE SALVAGE & FIRE

Your Global Emergency Response Partner

# About Us / Why are we here?

# Our Core Services

**Compliance**  
Resolve offers compliance coverage for OPA-90, China SPRO & Alaska APC

**Emergency Towing**  
Resolve provides emergency towing services worldwide using both our fleet and that of our service contractors

**Salvage**  
Resolve pre-positioned resources ensures rapid response to our clients needs across the globe

**Damage Stability**  
A proactive approach to reducing the amount of time needed to come up with a salvage solution

**Safety Training**  
Resolve provides training for vessel crews in addition to its own response personnel

# Principal Locations

OPA-90 RESPONSE  
DEPOTS

OFFICES

# Emergency Depots

## Strategically located emergency depots

Each depot is designed to minimize the amount of time to respond to a casualty

## Fly Away Packages

Equipment is packaged with documentation ready to be deployed on a vessel or aircraft & flown anywhere in the world at a moments notice.

## Custom Equipment

R&D / constant innovation and upgrades to deal with the difficulties of operating in a salvage environment.

## Continual Expansion

Always looking for new regions to expand our capability based on our clients needs.

# Emergency Towing Vessel Fleet

# Safety Training

## Fire School

Trains shipboard firefighters, vessel crews, and land based firefighters at its facility in Fort Lauderdale. Over 33,000 trained to date

## Bridge Simulator

Courses can be customized to your SPPs to provide realistic and relevant training.

## Engine Room Simulator

Customized vessel resource management combine bridge and engine training.

## eLearning

Resolve's training mediums have expanded into eLearning.

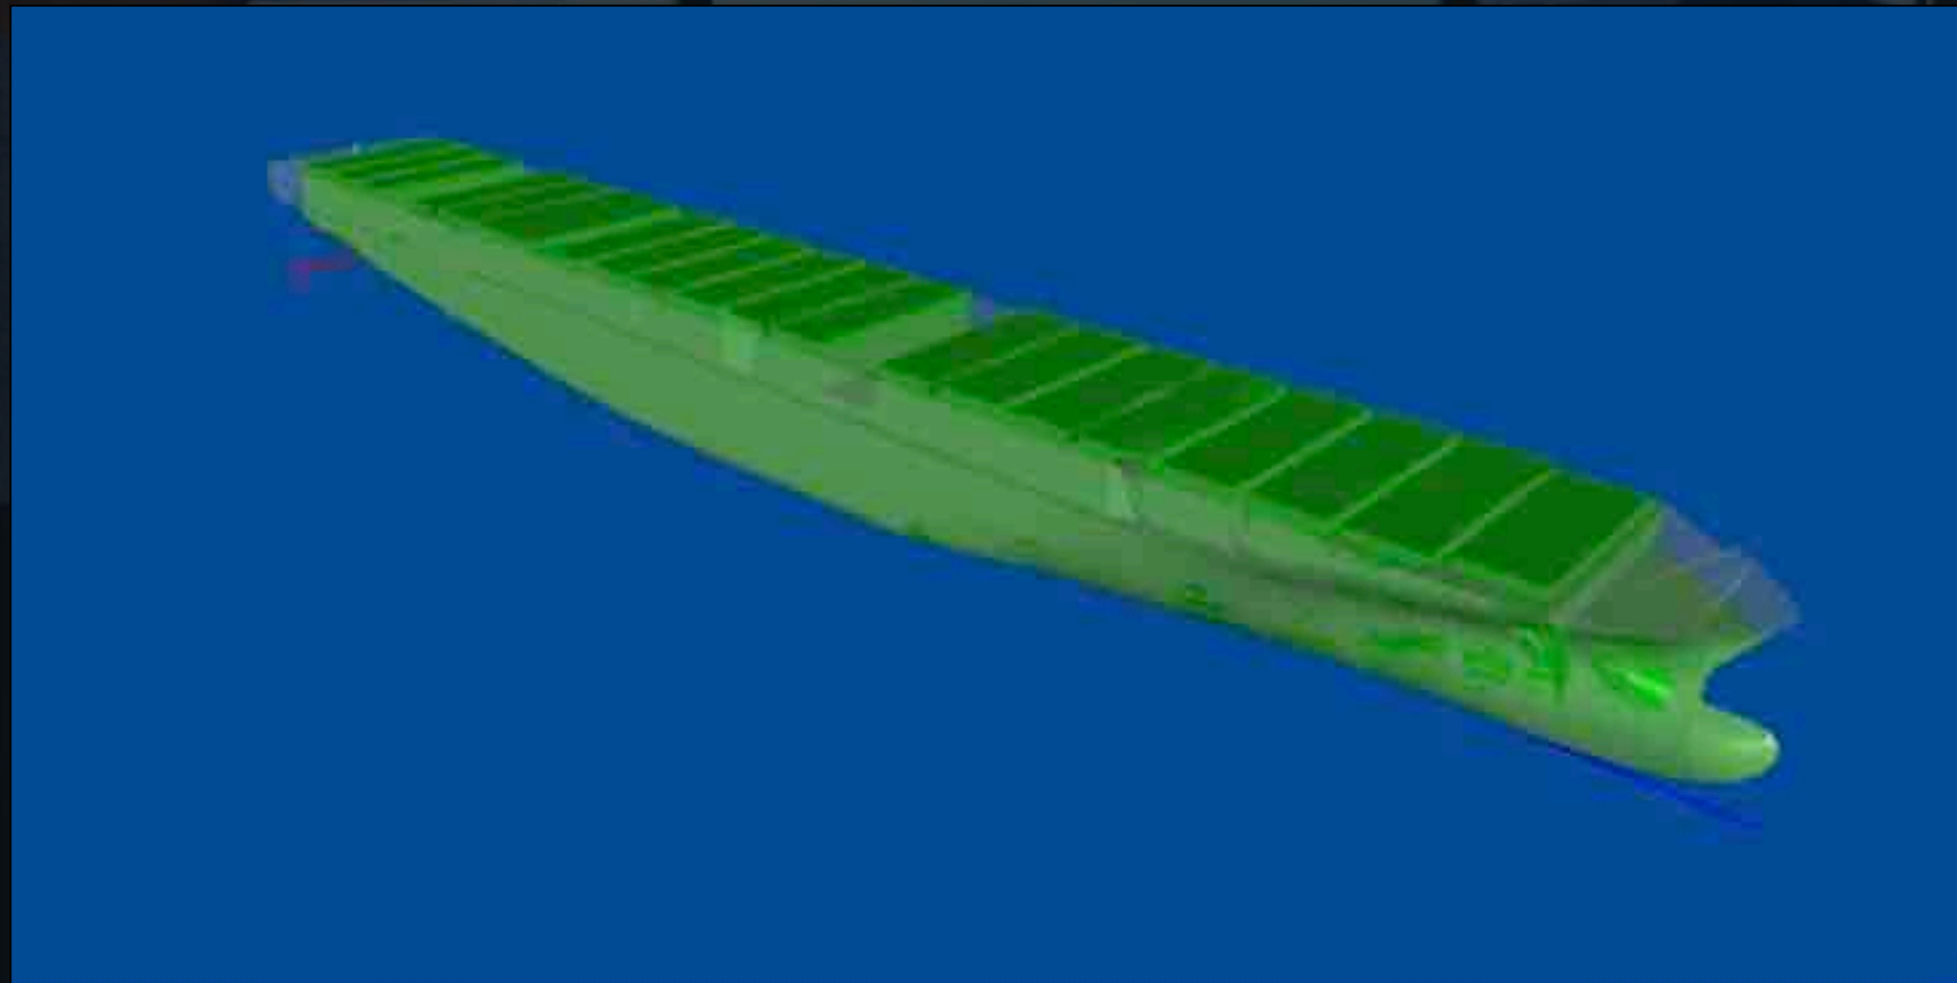

# Damage Stability

## What is it?

- The process of evaluating the stability and structural properties of a vessel during an incident.
- Database of ship's plans and hydrostatic models

## Why have it?

- Time!
- Allows responders to recreate the problem and simulate multiple solutions.
- Gives regulators, owners, and clients the opportunity to evaluate and approve a salvage plan prior to making operational decisions.

# Coast to Coast Compliance

China SPRO

Alaska APC

OPA-90 SMFF

Responding to the needs of our clients

# Response Scenarios

## Remote Assessment

Our trained personnel are always a phone call away

## Specialist Advisor

Expertise on the ground to manage difficult local conditions

## Assessment Team

Salvage teams on 24hr readiness to get onboard and provide critical feedback

## Emergency Towing

Strategically positioned in-house fleet along with global towage network

## Salvage Services

Experience and innovation to provide cost effective solutions
